Basic Life Support CPR

BLS CPR
(formerly Healthcare Provider CPR)

American Heart Association Training
As the world leader in Emergency Cardiovascular Care (ECC) and CPR training, we offer the highest-quality courses and training materials available.

Course Format
Video-mediated instruction is the primary format of our courses and our students follow the “practice-while-you-watch” format. This format allows for maximum skill practice time and is proven to help students learn multiple psychomotor skills. Throughout the course, instructors introduce a topic, then show a video segment that shows the steps to perform the skill.

Course Description
The American Heart Association’s Basic Life Support (BLS) training reinforces healthcare professionals’ understanding of the importance of early CPR and defibrillation, basic steps of performing CPR, relieving choking, and using an AED; and the role of each link in the Chain of Survival.
It is valid for college entrance prerequisites and accepted by all CA State Boards. BLS CPR is for employees who need CPR (cardiopulmonary resuscitation) training and a course completion card. The intended audience includes:
- Students: nursing, EMT, paramedic
- Medical Professionals
- Fire and EMS personnel
- Emergency Response Team personnel
- Dental Professionals
- Lifeguards

Course Content
- Personal Protective Equipment
- Scene safety
