RescueManager ™
AED Program Management Solution

RescueManager™ is a sole source, turn-key, four component solution for new or existing AED programs

Start-Up

Beginning your program with RescueManager™ will include:

- AED program assessment
- AED program design assistance
- RescueManager™ user manual
- Orientation to your online RescueManager™ account
- Data upload into your RescueManager™ account
- Medical prescription for any currently owned AEDs
- On-going customer support

Equipment

Whether you are adding another AED to your program, or are starting one from the ground up, we have AEDs, cabinets, signage, cases, pads, batteries, anything you need.

- We are an authorized distributor for multiple lines of AEDs
- Medical prescription for any purchased AEDs
- Provide guidelines to ensure AED placement is visible and ADA compliant

Data Management

RescueManager™ is an online data storage and management solution that provides a global view of all of your AED program assets.
